

How else can you fit 2.5 square miles of Late Cretaceous North America into your hall?

Invite your visitors to experience a simulation as meticulously created as the best museum dioramas and come face-to-face with dynamic Artificially Intelligent dinosaurs and other creatures.

Be the Dinosaur lets visitors explore subject matters from the latest theories on dinosaur behavior to nutrition and digestion to the basics of ecology...

...ONLY at your museum.

"This is the closest you may ever get to a safari trip in the Late Cretaceous!"

Dr. John R. Hutchinson, Ph.D.,
paleontologist, University of London

Simulator features:

1. High-Definition visuals
2. Rugged and attractive cabinet constructed with eco-friendly materials.
3. Intuitive and durable controls. Control options for young and old and the disabled.
4. Modular seating unit can be removed for smaller areas and wheelchair access.
5. Adjustable seat to accommodate visitors of all sizes and ages.
6. World-class panel of expert advisors from the fields of paleontology, biomechanics, paleobotany and interactive entertainment.

Dimensions:
68"H x 42"W x 78"D
Screen sizes from 42" to 60"
Weight: 500lbs*

*All specifications subject to change without notice.

Available for permanent installation in a multitude of colors and options.

"Our visitors have enjoyed utilizing the state-of-the-art technology that deeply immerses them in the experience of being a dinosaur.

[Be the Dinosaur] offers scientifically accurate information in a way that is truly engaging to visitors of all ages, and we commend [Eureka Exhibits] for producing a high quality experience."

Gail R. Becker, Executive Director,
Louisville Science Center
